EXPERIENCE

Nasdaq

May 2025 - August 2025

Software Developer Intern

- Implemented logic and automation to ensure trading data could seamlessly transfer, improving system reliability.
- Enhanced testing and deployment workflows by incorporating automation with Playwright and applying CI/CD principles, ensuring faster, more consistent delivery of software features.
- Gained experience working in an agile team environment, applying software development best practices, and learning how financial platforms are developed and maintained for global clients.

The Regional Municipality of York

April 2024 - September 2024

Data Analyst Intern

- Collaborated closely with the Program Manager and the Data Analysis Team to create and deploy Data Analysis & Reporting Power App to streamline data automation for Long Term Care Homes.
- Integrated data sources for a user-friendly interface, allowing clients to submit and manage requests efficiently.
- Managed Power Apps, Automate flows, SharePoint databases, and BI KPIs; improved data quality with SQL and Javascript

Budfor

Dec 2022 - September 2023

Full Stack Developer

- Developed and customized WordPress templates using HTML, PHP, CSS, and JavaScript to support affiliate marketing campaigns and landing pages.
- Integrated and configured essential WordPress plugins, while managing a MySQL backend for dynamic content and data storage.
- Collaborated in Agile development workflows, actively participating in stand-up meetings and cross-functional discussions to align on project goals and deliverables.

EDUCATION

Lakehead University

September 2022 - Present

Honors Bachelor of Science - Computer Science

Georgian College

September 2022 - June 2024

Diploma - Computer Program and Analysis
